Sebelum

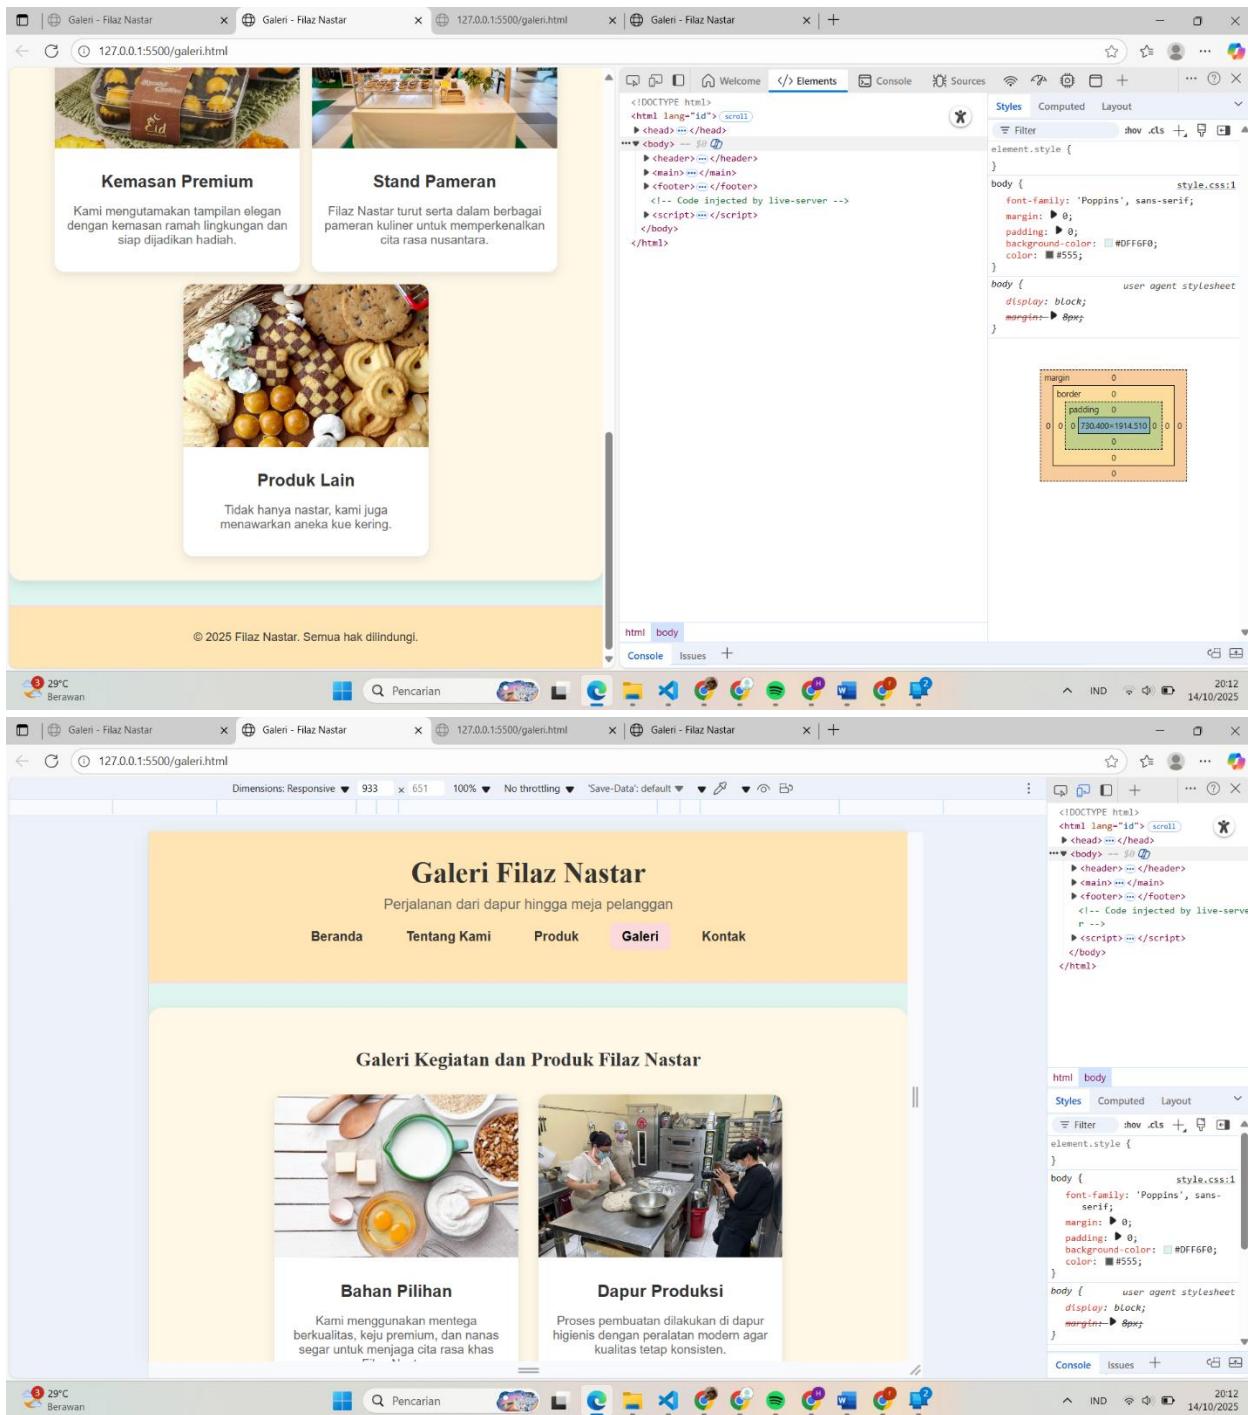

The screenshot shows a browser window with three tabs open. The active tab displays the website 'Galeri Filaz Nastar'. The header is yellow with the title 'Galeri Filaz Nastar' and a subtitle 'Kumpulan momen dan produk nastar premium kami'. Below the header is a navigation bar with links: Beranda, Tentang Kami, Produk, Galeri (which is highlighted in pink), and Kontak. The main content area is titled 'Galeri Produk dan Aktivitas' and features a large image of several yellow, round nianang balls. On the right side of the browser, the developer tools are open, specifically the 'Elements' tab under the 'Tools' menu. The 'Styles' panel shows the CSS for the main element, which has a max-width of 1000px, a margin of 30px auto, padding of 30px, a background color of #FFEB3, a border-radius of 15px, and a box-shadow of 0 5px 15px rgba(0, 0, 0, 0.1). The 'Inherited from body' section shows the body's font-family is 'poppins', sans-serif, with a margin of 0, padding of 0, and a background-color of #DFF6F8. A green box highlights the main content area in the DOM tree.

This screenshot shows the same website after optimization. The header is now light blue with the title 'Galeri Filaz Nastar' and subtitle 'Kumpulan momen dan produk nastar premium kami'. The navigation bar remains the same. The main content area is titled 'Galeri Produk dan Aktivitas' and features a different image of yellow nianang balls. Below the image is the caption 'Nastar Original' and a description 'Rasa klasik dengan isi nanas manis legit, favorit semua kalangan.' The browser interface at the bottom includes a weather widget (27°C, Berawan), a search bar, and various system icons. The date and time are shown as 14/10/2025 and 22:16 respectively.

SESUDAH

The screenshot displays the final version of the Filaz Nastar website as it would appear in a browser. The layout is clean and professional, featuring a header with the company name and a main content area divided into three distinct sections: "Kemasan Premium", "Stand Pameran", and "Produk Lain". Each section contains descriptive text and images. A footer at the bottom provides copyright information. The developer tools sidebar on the right shows the underlying HTML code and the CSS styles being used, including the "style.css" file which defines the "Poppins" sans-serif font, white background colors, and specific margins and padding for the body and main elements.

The screenshot shows a web browser window with three tabs, all titled "Galeri - Filaz Nastar". The active tab is "127.0.0.1:5500/galeri.html". The page content includes:

- A header section with a storefront image and the text "Toko Filaz Nastar". Below it is a subtitle: "Tempat di mana pelanggan bisa mencicipi dan membeli langsung produk-produk nastar kami."
- A section titled "Kemasan Premium" featuring an image of yellow nasi kuning in clear plastic containers with brown lids.
- A section showing the interior of the shop with various products displayed on shelves.

The browser's developer tools are open on the right side, with the "Elements" tab selected. The "Styles" panel shows the following CSS for the body element:

```
<!DOCTYPE html>
<html lang="id"> </html>
  > <head> ... </head>
  ><body> ... </body>
    > <header> ... </header>
    > <main> ... </main>
    > <footer> ... </footer>
    > <!-- Code injected by live-server -->
    > <script>... </script>
  </html>
```

```
body {
  font-family: 'Poppins', sans-serif;
  margin: 0;
  padding: 0;
  background-color: #DFF6F0;
  color: #555;
}

body {
  user agent stylesheet
  display: block;
  margin: 0px;
}
```

The "Elements" panel also displays a visual representation of the DOM structure with colored boxes indicating the bounding boxes of different elements. The body element is shown as a large orange box, and its child elements are shown as nested boxes within it.
